

K-Love serves our local community in a very positive way. Our local non-profit events can be posted and they play christian pop music, which is important to our local community. Further, if the FCC displaced this radio station, it would severely impact our local community and non-profit agencies. Klove serves the public interest by allowing non-profits to participate in radio broadcasting, by broadcasting positive, encouraging messages (boy, we need more of those) and by providing alternative, positive music for our community and young people. Please do not take Klove off the air!
